Animal Care
Company History

Since 1987, Spray Master Technologies has been innovating and manufacturing commercial cleaning systems for retail and commercial operations. Spray Master Technologies is the original innovator and the leading supplier of central pressure cleaning systems. Our experience, commitment to excellence, and full line of pressure cleaning systems and accessories combine to provide best in class solutions for cleaning and sanitizing all areas inside and out of any operation.

In 2017, Spray Master Technologies redefined the pressure washer with the introduction of the Momentum Series, an industry first line of intelligent pressure cleaning systems. With the ability to program different remote locations with different pressure, water volume, and temperature, the Momentum series allows indoor and outdoor cleaning with one unit and the pressure, volume and temperature that is right for each application.

Designed with ease of use in mind, Spray Master Technologies systems are as easy to use as the flip of a switch. Also, the many built in safety features will ensure your Spray Master Technologies system keeps your facility clean for many years to come.

Commercial quality, ease of use, and best in class performance combine to provide the absolute best solutions for a clean and sanitary facility.

SMT for Animal Care

Spray Master Technologies takes you beyond traditional cleaning methods with powerful, flexible, efficient and effective solutions that are long lasting and easy to use. SMT ensures a great experience for pets and owners alike.

Inside:
SMT delivers results that no mere mop can match. Getting deep into the pores of the floor to remove germs and odor for a clean you can see, feel and smell.

Outside:
SMT makes cleaning your outdoor, enclosures, and holding areas easier than ever before. Your outside appearance will be sure to make the clean first impression that wins first time customers and keeps them coming back.

POWER UP YOUR CLEAN
The Momentum 2.1 is the stand alone wall mounted version of the Momentum Series. Designed for single area cleaning, the Momentum 2.1 gives you the ability to effectively and efficiently clean targeted areas in your facility. With the same advanced features of the Momentum Series, you are ensured both accuracy and performance. Installation in new and existing facilities is easily accomplished and cleaning is always available at the flip of a switch. Get the Momentum 2.1 today and POWER UP YOUR CLEAN.

Spray Master Technologies
Momentum pressure cleaning systems offer an effective and efficient way to clean your facility. Always ready to go, our wall mount system offers the ability to clean at the flip of a switch. With up to two chemical injectors, it also allows for accurate metering of your preferred soap and sanitizing agent.

Central systems offer the ability to clean multiple areas with a single unit and remote station control.

The NEW Momentum brings advanced features and technology in a compact, easy to use system, including the ability to accurately meter and apply AHP products.

All units are compatible with our time saving and affective accessories including the Foamer and other Wands, Trap Shooter, and Wall & Tile Brush.

The power and efficiency of an SMT Momentum system paired with our line of effective cleaning accessories will provide you an unmatched clean.
CENTRAL SYSTEMS

SMT - Central Systems

Central Systems from Spray Master Technologies® are ideal for those who need to clean multiple areas within the same facility. SMT’s Central System serves multiple remote locations from one centrally located pumping unit.

If you have multiple users, add more SMT units with our rack mount system. Up to three can be installed on each rack.

Adjustable chemical injection and water pressure can be set to your specifications, giving you full control over your cleaning needs. SMT is made to fit your facility and made to meet your needs.

If you want customization, ease of use, and fast cleaning time USE SMT.

SMT - Vac Master System®

This central wet/dry vac is placed centrally with runs out to remote locations. With the wet option, you will be washing, rinsing, and sanitizing your floors; while at the same time vacuuming excess water and matter.

Use the dry option to remove hair and other dirt, like a regular vacuum.
Spray Master Technologies’ new Momentum series redefines the pressure washer industry. With an industry first smart control system, the Momentum Plus 2.1 gives you the information you need to ensure proper operation, pressure, and chemical metering.

The Momentum Plus is SMT’s premier central system. Incorporating new technology with our proven central pressure cleaning concept, brings the most advanced cleaning system available today. Customizable to fit your specific needs. SMT’s Momentum Plus will provide an unmatched level of clean in all areas of your facility. Let SMT customize a system for your facility today.

The advanced control system provides constant monitoring of performance and maintenance conditions to ensure maximum reliability and performance are achieved. One centralized “brain” to control multiple remote stations. Advanced metering capability allows you to accurately control chemical dilution with the touch of the button.
The SMT portable systems are the perfect solution for keeping your facility spotlessly clean. They each feature an industrial 3 cylinder plunger pump powered by a 2HP fully enclosed motor. SMT portable systems are the most durable and efficient portable pressure washers on the market.

**SMT-600PEW Portable**
- 36" Heat Guard Spray Wand
- 30' Steel Braided Industrial Hose
- Water Inlet Supply Hose
- 35' GFCI Power Cord
- 2.2 gpm @ 1100 psi
- 2.9 gpm @ 850 psi
- 115v

**SMT-600PE Portable**
- Anti-Siphon & Backflow Protection
- Stainless Steel Wand Hanger
- Hose Hanger

**SMT-1100PE Portable**
- Stainless Steel Construction
- Shut-Off Quick Connect
- Stainless Steel Tubing or High Pressure Hose Supply
- Can be located 500 Feet From the Pumping Station
- Hose Hanger
- 35' GFCI Power Cord
- Chemical Hook
- Thermal Relief Valve

**STANDARD FEATURES**
- Rust Free Hose Reel with Hose Guide
- Quick Coupler Connections
- Dual Chemical injection
- Maintenance Kit Included
- HD Casters (optional)

**FEATURES**
- Stainless Steel Wand Hanger
- Hose Hanger
- Anti-Siphon & Backflow Protection
- Stainless Steel Construction
- Stainless Steel Wand Hanger
- Quick Coupler Connections
- Dual Chemical injection
- Maintenance Kit Included
- HD Casters (optional)
**ACCESSORIES**

**Airless Foamer and HP Spray Wand**

- **Foamer And HP Spray Wand**
  - Foam Impacts at a Lower Pressure Than Spray, Used on More Delicate Surfaces
  - Stainless Steel Components
  - Achieves Chemical Concentrations up to 7:1
  - HP Nozzle on Spray Wand for Rinse.
  - Easy Quick Disconnect for Interchangeable Parts

- **Trigger Gun**
- **24” Stainless Steel, Bent, Insulated Grip**
- **Dual Nozzle**
- **Flow Thru Quick Connect**
- **2.2 gpm**

**Dual Spray Wand**

- **47” Overall Length**
- **36” Aluminum Lance**
- **Stainless Steel Ball Valve**
- **Quick Connect Socket**
- **10” Brush Head with Nylon Bristles**

**Wall and Tile Brush**

- **47” Overall Length**
- **36” Aluminum Lance**
- **Stainless Steel Ball Valve**
- **Quick Connect Socket**
- **10” Brush Head with Nylon Bristles**

**Trap Shooter®**

- **For all SMT Systems**
- **Rear Facing Jets Pull Cleaning Nozzles Through Drains**
- **Forward Jet Blasts Clogged Drains With High Pressure**
- **Long Lasting Quality Construction**
- **10’ Flexible High Pressure Hose**
- **Heavy Duty Spray Gun**
- **Quick Connect**

**HOSE MANAGEMENT**

**SMT- 300HDR Heavy Duty Hose Reel**

- **Quick Connect Socket**
- **12’ High Pressure Supply Hose**
- **Stainless Steel Spray Gun Hanger** (spray gun sold separately.)
- **Friction Brake**
- **Locking Reel**
- **Powder-Coated Finish**
- **Ergonomic Design**
- **10” Semi-Pneumatic Wheels**
- **Holds up to 200’ of Hose**

**SMT-Wall Mount Hose Reel**

- **Quick Connect Socket**
- **12’ High Pressure Supply Hose**
- **Stainless Steel Hose Reel Version Available**

**SMT- Heavy Duty Retractable Hose Reel**

- **Quick Connect Socket**
- **12’ High Pressure Supply Hose**
- **50’ HP Hose**
- **Friction Brake**
- **Ergonomic Design**
When administering SMT’s ERASR steps correctly, you will safely and efficiently get a superior clean. After chemical contact time has done its job eliminating the deadly pathogens, SMT simply rinses away the dead debris. SMT’s customizable pressure allows you to choose your own settings to get in to the pores of the floor’s surface thus eliminating the unnecessary manual labor involved with scrubbing. Spend less time cleaning and more time with your animals. Combining the unmatched effectiveness of an SMT cleaning system and the ERASR protocol will provide the results you and your guests will appreciate.

**ERASR PROTOCOL**

1. **EVACUATE**
   animals

2. **REMOVE**
   solid waste

3. **APPLY**
   chemical following recommended dilution ratio and contact time.

4. **SPRAY**
   kennels with fresh water.

5. **REPEAT**
   Use your SMT system daily for maximum effectiveness.

**POWER UP YOUR CLEAN**
Complete your Clean with an SMT VacMaster® Central Vacuum System for Your Facility.

More and more owners are opting for no floor drains in many areas of their facilities. For these areas consider purchasing a VacMaster® Central Wet/Dry Vac System. With this you can deliver chemical and water and then vacuum them away.

In other areas, such as grooming, you may have no need for the full wet dry vac setup. We have you covered there as well with the Dry Interceptor. Add tools such as floor sweeps and Wally Flex wands for extra convenience.

Combine the VacMaster® with an SMT system for a very powerful, effective cleaning system.

Like all SMT systems the VacMaster® is easy to set up, easy to use and always ready to go.

POWER UP YOUR CLEAN

SMT VacMaster® Central Wet Dry Vac System

SMT VacMaster® is a perfect solution for cleaning areas without floor drains. Like the SMT Central System, the VacMaster® is placed centrally and run out to remote locations. In less time than it takes to fill a mop bucket you will be washing, rinsing, and sanitizing your floors; while at the same time vacuuming excess water and gray matter from the gaps in your floors. The SMT VacMaster® Central Wet Vac Main Unit can be installed in new or retrofit installations.

FEATURES

- Works with Low Pressure Systems
- Industrial Central Fluid Extractor
- Automatic Dust Filtration by 2 Low Flow Cold Water Jets
- Automatic Self-Flushing Drain
- 2, Industrial 120v Motors
- 180 H2O (Inches) Lift
- 120 ft 3/min Air Flow
- 706 Air Watts
- 6 Gallon Capacity with Automatic Flushing for Continuous Use
- Weight (No Water): 80 lbs / 36 kg
**SMT VacMaster® Booster**
A booster head will increase the power of your VacMaster System. This will allow you to expand your system farther and with more remotes throughout your facility.

- Optimize Air Circulation and Performance
- Adds Extra Power to Your VacMaster System
- Add One or More at Anytime
- Will Not Add to the Height of the Unit
- 2 Stages
- 20A Fuse
- 8 Fans
- Wall Mount

**SMT VacMaster® Dry Interceptor**
The Dry Interceptor will collect debris from “dry only” areas such as grooming and other areas where dry materials need to be collected.

**Wally Flex**
Dry use only. Conveniently hangs on your wall for quick access. For small immediate area jobs. Keep at a grooming station or surgery area to clean up hair.

**Wand**
Dry Only
If you need a wand to use with dry vac and dry vac function only, this sturdy, lightweight stainless steel wand is the tool for you. It features an ergonomic handle and rear wheel for easy gliding action.

**Hand Tool**
- **wet**
- **Dry Only**

- **Dry Only**
VAC ACCESSORIES

DEMA Chemical Pump
The SMT Vac Master now features an optional chemical pump to deliver metered chemical to the ports. (wet vac only)

VacMaster™ Vacuum Hose Reel
Wet/Dry Vac
A tall ergonomically designed frame makes the Vacuum Hose Reel easy and safe to move from storage to the cleaning area. The design has the capacity to transport up to 50 feet of 2 inch vacuum hose. The one piece frame eliminates movement and wear and prevents shearing of the attached hardware.

FEATURES
- Up to 50 Feet of Hose
- Basket
- Wand Holder

Chemical Wand

VacMaster™ Vac Inlet, Chemical & Water Outlet

VacMaster™ Vac Dry Only Inlet

VacMaster™ Floor Sweep (dry use only)
With Spray Master Technologies you get a clean you can see.

Keep that new business look with SMT where you can see the clean inside and out. Your customers and employees will appreciate patronizing and working in a business that looks like it did on opening day. Proven tools quickly power wash inside surfaces for a clean you can see. Outside, SMT will keep your curb appeal high and your enclosures looking their best.

With Spray Master Technologies you get a clean you can feel.

Increase your confidence about work floor surfaces with a clean you can feel. Floor scrubbers along with mop and bucket cleaning approaches are limited in their ability to deep clean surfaces. Eliminate slimy floors and replace them with a clean you can feel after using an SMT pressure washing system. Our systems reach into the pores of your floor’s surface removing slime and grime. Give yourself, employees and customers a clean and sanitary facility that they will feel when they walk in.

With Spray Master Technologies you get a clean you can smell.

No one likes bad odors. Kennels and grooming areas harbor odor diminishing the hard work you’ve done to create a memorable experience for your clients and employees. SMT pressure washing systems will help you to keep your business clean with the smell you desire them to experience.

With Spray Master Technologies you get a fast ROI.

Save water, chemicals, energy, labor, time and money!

**Water:** SMT systems use up to 75% less water than a garden hose.

**Chemicals:** Accurately metered and injected at the main unit to ensure proper application. With SMT, less chemicals are used, up to 75% less, than with the mop and bucket or hose applications.

**Energy:** SMT systems are highly efficient and also save you with shorter cleaning times.

**Labor:** Due to the adjustable pressure and labor saving tools, you eliminate the time scrubbing when using a brush or a mop and bucket.

**Time:** With SMT cleaning requires little set up time. The system is always ready at the flick of a switch. Plug it in, turn it on and start cleaning. Spend no time scrubbing and get better results than traditional cleaning methods.

**Money:** All of the above lead to an unmatched clean and they all add up to saving money, too. Let SMT help you have a cleaner facility in less time, while saving money.
